Silicone Rubber Roller

Silicone Rubber Roller is a dust & particle cleaning roller, which can be used in vast range of industries. This product especially shines where you need a cleaning roller that leaves absolutely no residue behind, or that is heat and chemical resistant to legitimate degree.

Being a reusable roller, this product may reduce your long-term cost of using disposable variants. You can simply wash and dry the roller after using, but more common way is to use it with DCR-Pad as it cleans the roller very quickly, making the whole work process super efficient.
