

# ESD GRID CURTAIN

ESD Grid Curtain is engineered by printing black conductive printing ink onto ESD transparent PVC film, significantly enhancing the electrostatic dissipative performance of the grid side of the PVC curtain. This critical feature ensures effective prevention of static electricity buildup.

## Description

**Part Number: AX-M03**

PVC Roll, ESD Grid Curtain - ESD both sides  
0.3mmT x 1370mm x 30m

Specially formulated conductive carbon grid printed on normal transparent PVC film. The surface resistance of the carbon printed side is 10e4~10e6 ohm.

## Applications

Door strip, soft wall, partition, curtain

Portable window and partition

Precision equipment and machine cover

Shielding and blocking partition

Screen door or window

Reduction of harmful ultraviolet ray

Reinforcement of existing window or partition

## Features

- Two designs of honeycomb patterns
- Antistatic, static dissipative or conductive
- Extremely low electrostatic generation
- Dust and particles are not accumulated on the surface
- Clear transparent for good visibility
- Conductive carbon printing is not removed easily
- Various thicknesses and sizes are available
- Individual carton packing in roll

## Varieties

ESD Grid Curtain Film

ESD Clear Curtain Film

ESD Grid Opaque Curtain Film

ESD Clear Adhesive Curtain Film
